

## TECHNICAL STAFFING SOLUTIONS

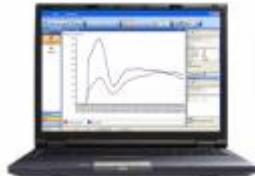

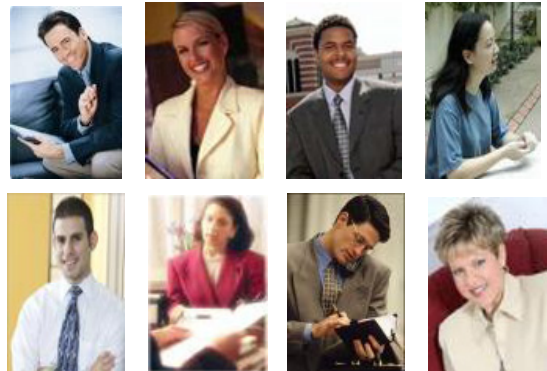

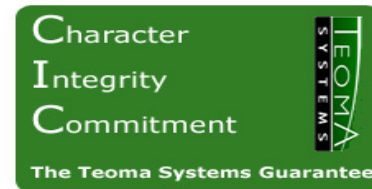

Teoma Systems is an IT Solutions provider with a proven track record of technological excellence. For nearly 15 years, we have helped over 500 clients utilize technology to achieve business results. Our services are available through traditional temporary or contract staffing, on-premise/managed staffing and evaluation/direct hire. Our hiring process includes recruiting, interviewing, screening, testing, reference checking, drug screening (if applicable), and conducting employer-specific orientations. We know the information technology field, and you can be assured we will put your prospects through the same rigorous technical interviews we use for our own employees. Our knowledge of information technology will not only better qualify the candidates we bring, but also save you time, money, and the hassle of making an expensive mistake by using a non-IT company for your IT staffing needs.
