

Systems Integration Delivered with Commitment

Objectworld Announces Agreement with Teoma Systems

Troy, MI — December 11, 2006 – Objectworld Communications Corp., a leading provider of unified communications software for Microsoft® Windows® platforms, today announced that it has signed a distribution agreement with Teoma Systems, an Objectworld Gold Reseller and a leading distributor of VoIP products, solutions and professional services headquartered in Troy, MI. Teoma Systems, recipient of Objectworld's "Business Partner of the Year" award in 2005, will distribute Objectworld Unified Communications Server™ and provide immediate sales and support for their partners and customers.

"We're very excited to welcome Teoma Systems into a growing number of Objectworld distributors, resellers and other partners for Objectworld UC Server," said Steve Grassie, Objectworld's vice president of business development and marketing. "The company combines a rare understanding of the issues surrounding telephony, an in-depth knowledge of both the IP and SIP space, a variety of professional and value-added services and an innovative customer support model."

Shipping since March 2006, Objectworld Unified Communications Server™ puts the IT Data Center in control of unified communications with the first low cost, all-in-one IP-PBX and SIP unified communications productivity software for Microsoft Windows platforms. Objectworld UC Server™ simplifies administration seamlessly in real-time with Microsoft Active Directory®, lowers total cost of ownership and enhances productivity by linking business communications with business processes.

"We are very enthusiastic about this new offering from Objectworld," said Michael Quarton, Chief Executive Officer of Teoma Systems. "We have had tremendous success with their Unified Messaging offer, Call Attendant Office, and UC Server is a new IP-PBX product that is built upon this already mature messaging, call routing and IVR system. This will allow us to offer a flexible, forward thinking and cost saving solution, and it is a great addition to our portfolio of best-in-class products."

About Objectworld Communications Corp.

Objectworld Communications Corp. is the first and only provider of IT Telephony™, the next step in the convergence of telephony into the IT Data Center. Objectworld products lower costs and enhance productivity by extending or replacing traditional PBX systems with SIP unified communications productivity software for Microsoft® Windows™ platforms administered seamlessly in real-time with Active Directory™. With Objectworld's hardware-neutral approach and strategic alliances with leading SIP endpoint vendors through the Objectworld Connect™ Partner Program, customers enjoy unprecedented choice, control and security. Objectworld is the intelligent choice for organizations seeking to gain competitive business advantage by integrating business communications with business processes.
